

Habib Ibrahim Toure

(263) 380-1852 | htour018@uottawa.ca | [LinkedIn](#) | [GitHub/lein5in](#) | [Portfolio](#)

2nd-year Computer Science Co-op student at uOttawa seeking a 4-month internship in Software Development or AI/ML

EDUCATION

University of Ottawa

Ottawa, ON

B.Sc. (Specialized) in Computer Science, Co-op | International Student Merit Scholarship – \$36,000/yr Sept. 2024 – 2028

- Relevant coursework: Data Structures and Algorithms, Computer Architecture, Introduction to Software Engineering

EXPERIENCE

Data Annotation & AI Training Specialist

June 2025 – Oct. 2025

DataAnnotation

Remote, ON

- Annotated and prepared datasets across 5+ ML projects to train and evaluate machine learning models
- Developed Python automation scripts to streamline repetitive annotation workflows, reducing manual effort by ~30%
- Analyzed model outputs and provided structured feedback to improve accuracy and consistency of AI systems
- Collaborated with a remote AI development team to identify labeling inconsistencies and refine annotation guidelines
- Contributed to data quality initiatives by reviewing edge cases and flagging ambiguous samples for team discussion

PROJECTS

Fretify | *Python, FastAPI, React, TypeScript, Librosa, Basic-Pitch, Demucs*

Oct. 2025 – Present

- Building an AI application that converts audio/video recordings into guitar tablature using machine learning
- Implemented audio processing pipeline with Librosa and Basic-Pitch for note detection and MIDI conversion
- Integrated Demucs for instrument separation to isolate guitar tracks from mixed audio sources
- Designed full-stack app with FastAPI backend and React/TypeScript frontend with interactive tab visualization
- Designing a real-time coaching system with performance feedback to assist beginner guitarists

UTaste | *Java, Android, SQLite, Retrofit, OpenFoodFacts API, Unsplash API*

Sept. 2025 – Nov. 2025

- Collaborated in a team of 3 to build an Android restaurant management app with multi-role functionality
- Designed SQLite database architecture to manage users, recipes, ingredients, and sales
- Integrated OpenFoodFacts API via Retrofit to retrieve nutritional info automatically through QR code scanning
- Implemented sales tracking, reporting features, and automated nutritional profile calculations
- Applied Agile methodology across 4 iterative deliverables, meeting all project milestones on time

Personal Portfolio | *React, JavaScript, HTML/CSS, Vercel*

Sept. 2025

- Built and deployed a responsive personal portfolio website to showcase projects and technical skills
- Designed clean UI with React components and CSS animations for smooth user experience
- Integrated GitHub API to dynamically display repository stats and recent project activity

SamuraiGame | *Unity 3D, C#*

Jan. 2026 – Present

- Developing a 3D arena combat game featuring 3 playable humanoid characters, each with unique weapons and move sets
- Implemented character movement systems and input handling scripts for responsive player controls
- Designing distinct combat mechanics and techniques per character to ensure varied gameplay experience

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C#, HTML/CSS, SQL, Assembly

Frameworks & Libraries: React, FastAPI, Node.js, Scikit-learn, NumPy, Librosa, Retrofit

Databases: MySQL, SQLite

Developer Tools: Git, Docker, Linux, Unity 3D, VS Code, OOP, CI/CD, Unit Testing

Other: Bilingual (English/French), API Development, Machine Learning fundamentals
